

Lesson 66 Practice: Current-Paper Depth Audit and Technical-Post Routing

JKSSB Computer Awareness

October 10, 2026

Provenance: All 25 questions are original exam-pattern questions (*[Original]* plus the *[JKSSB FAA-pattern]*, *[JKPSI-pattern]*, *[SSC CGL-pattern]*, and *[JKSSB-pattern]* extension items, including MSQs); none reproduces an official paper item.

Q1. *[Original]* Which depth tag fits the item “F5 starts a slide show from the beginning”?

- A. Core-General
- B. Current-General
- C. Technical-Post
- D. Version-Sensitive

Q2. *[Original]* Which depth tag fits the drill “convert binary 11010101.01 to decimal”?

- A. Core-General
- B. Current-General
- C. Technical-Post
- D. Version-Sensitive only, with no other tag

Q3. *[Original]* Which depth tag fits the item “name the latest anti-virus”?

- A. Core-General
- B. Current-General
- C. Technical-Post
- D. Out of scope entirely

Q4. *[Original]* Which depth tag fits the item “which tab holds this Word command” when no Office version is stated?

- A. Core-General
- B. Current-General
- C. Technical-Post
- D. Version-Sensitive (flag as under-specified)

Q5. *[Original]* A dispute arises over a Junior Assistant computer item. Which source settles it?

- A. A Tier-2 MCQ bank key

- B. A coaching tutorial
- C. The JA 2026 final answer key
- D. A general textbook treatment

Q6. *[Original]* Which of the following is **NOT** a correct statement about source tiers?

- A. A Tier-1 final key supersedes every bank on a disputed item.
- B. A Tier-2 bank may supply practice items and distractors.
- C. A Tier-2 bank may overrule a Tier-1 final key when they disagree.
- D. Tier-3 references explain concepts but settle no exam dispute.

Q7. *[Original]* Expand ISP.

- A. Internet Service Provider
- B. Internal Server Protocol
- C. Internet System Program
- D. Inter-State Protocol

Q8. *[Original]* Evaluate the statements:

- I. The provisional key is subject to change and is never memorised as final.
 - II. The final key settles disputed items for its post.
 - III. A Tier-2 bank overrules a Tier-1 final key when they disagree.
- A. I and II only
 - B. II and III only
 - C. I and III only
 - D. I, II, and III

Q9. *[Original]* Which pair correctly matches the ledger ID to its source?

- A. SRC-03 — Computer Instructor 2025 paper
- B. SRC-05 — Junior Assistant 2026 paper
- C. SRC-06 — JA 2026 final answer key
- D. SRC-08 — WO 2026 provisional key

Q10. *[Original]* Which claim is version-sensitive and must be tied to a stated version before it is trusted?

- A. The bit is the smallest unit of data.
- B. Mail Merge combines letters with an address database.
- C. The exact tab location of a Word command in a stated Office version.
- D. RAM is volatile.

Q11. *[Original]* Which statement about POP3 and IMAP is correct?

- A. POP3 keeps mail synced on the server; IMAP downloads once.

- B. POP3 downloads to the local machine; IMAP syncs across devices.
- C. POP3 and IMAP are identical in behaviour.
- D. POP3 is a web browser; IMAP is an operating system.

Q12. *[Original]* IPv6 uses which address size?

- A. 32-bit
- B. 64-bit
- C. 128-bit
- D. 256-bit

Q13. *[Original]* Which statement correctly distinguishes a digital signature from encryption?

- A. A digital signature provides authenticity and integrity; encryption provides confidentiality.
- B. A digital signature encrypts the body so only the recipient reads it; encryption verifies the sender.
- C. Both terms mean exactly the same protection.
- D. A digital signature compresses the file; encryption deletes it.

Q14. *[Original]* Which study plan commits the over-generalisation error?

- A. A JA candidate masters Core-General recall first, then reads technical depth lightly.
- B. A CI candidate masters both Core-General recall and Technical-Post computation.
- C. A JA candidate masters the full CI computation block as if the JA paper tested it.
- D. A WO candidate checks both the provisional and the final key.

Q15. *[Original]* Which step order gives the correct five-step revision workflow?

- A. Tag items, route study, collect Tier 1, screen versions, diff keys.
- B. Collect Tier 1, tag items, diff keys, screen versions, route by post.
- C. Diff keys, collect Tier 1, route by post, tag items, screen versions.
- D. Route by post, screen versions, diff keys, tag items, collect Tier 1.

Q16. *[Original]* A provisional key and the final key disagree on one computer item. What is the correct action?

- A. Memorise the provisional answer, since it came first.
- B. Follow the final key, flag the stem wording, and teach the stable concept.
- C. Follow the Tier-2 bank instead of either key.
- D. Drop the whole topic from revision.

Q17. *[Original]* Which practice labelling is correct?

- A. A generated item labelled as a verbatim PYQ with a paper and year.
- B. A generated item labelled *[Original]* with no paper claim.
- C. A Sanfoundry-derived item labelled as a verbatim PYQ.

D. A paraphrased official item labelled with an exact PYQ number from memory.

Q18. *[Original]* Which set of near neighbours correctly tests the BCC concept?

- A. BCC hides recipients from each other; To and Cc are visible to all; the sender always knows.
- B. BCC hides the sender and all recipients from each other including the sender.
- C. BCC forwards mail automatically; Cc deletes it.
- D. BCC encrypts the message body; To verifies the signature.

Q19. *[Original]* Which shortcut starts a slide show from the beginning?

- A. F5
- B. F7
- C. F9
- D. Shift + F1

Q20. *[Original]* A formula in Excel must start with which character?

- A. =
- B. +
- C. %
- D. #

Q21. *[JKSSB FAA-pattern]* Which command shows the path packets take to a destination?

- A. tracert/traceroute
- B. print-screen
- C. volume-up
- D. paper-cut

Q22. *[JKPSI-pattern]* Which device forwards packets between different networks?

- A. Router
- B. Printer
- C. Speaker
- D. Scanner

Q23. *[SSC CGL-pattern]* A MAC address identifies which item?

- A. A network interface card/device
- B. A printed book page
- C. A speaker's brand
- D. A paper envelope

Q24. *[JKSSB-pattern]* **(MSQ: select ALL correct options.)** Which statements about technical-post routing are correct?

- A. Routers forward packets using IP addresses.
 - B. Traceroute lists hops along the path.
 - C. Firewalls can filter routed traffic.
 - D. Printers assign IP routes to packets.
- Q25.** *[SSC CGL-pattern]* **(MSQ: select ALL correct options.)** Which address pairs are correctly matched?
- A. IP address – network-layer device identity
 - B. MAC address – hardware interface identity
 - C. Port number – application/service identity
 - D. IP address – printer ink colour
- Q26.** *[Original]* A question copied from a past paper should be labeled as a PYQ only when:
- A. Its exam identity and source are traceable
 - B. It resembles a familiar exam style
 - C. It appears in an uncredited mock test
 - D. Its answer seems obvious
- Q27.** *[Original]* If a secondary transcription's answer conflicts with the official final key, which should govern the answer?
- A. Official final key
 - B. Secondary transcription
 - C. A generated explanation
 - D. Whichever option appears first
- Q28.** *[Original]* An MSQ written for practice based on a single-answer exam topic should be labeled:
- A. Original MSQ drill
 - B. Verbatim PYQ
 - C. Official multi-select question
 - D. Final answer key
- Q29.** *[Original]* Which information belongs in a reliable PYQ provenance note?
- A. Exam/post, year, question identity, and source/key status when known
 - B. Only the topic name
 - C. The writer's guess about the year
 - D. A generated question's difficulty label only
- Q30.** *[Original, MSQ drill]* **(MSQ: select ALL correct options.)** Which curation practices protect PYQ integrity?
- A. Keep generated questions labeled as original.
 - B. Preserve the exact exam/date/question source for a PYQ.
 - C. Check disputed answers against the official key.
 - D. Label every exam-style question as an authentic PYQ.
