

Digital Platforms & E-Governance

Lesson 57 — Named Platforms and G2x Recognition

JKSSB Computer Awareness

October 8, 2026

What e-Governance Means

- ▶ **e-Governance** is the use of Information and Communication Technology (ICT) by government to deliver services.
- ▶ It makes services accessible, efficient, transparent, and reliable.
- ▶ It shifts service delivery from physical counters to online portals.
- ▶ e-Governance is about **governance**, not merely technology.

The one idea

e-Governance uses ICT so that government services reach the common man in his locality, at affordable cost.

The G2x Family

Type	Full form	Who is served
G2C	Government to Citizen	The general public
G2G	Government to Government	Government departments and levels
G2B	Government to Business	Businesses and companies
G2E	Government to Employee	Government employees

The letters say who talks to whom: C = citizen, G = government, B = business, E = employee.

Recognising G2x in Examples

- ▶ **G2C**: UMANG, DigiLocker, applying for a certificate, paying a utility bill.
- ▶ **G2G**: e-Office, PFMS (working between government departments).
- ▶ **G2B**: GeM (Government e-Marketplace), GSTN.
- ▶ **G2E**: an employee service book or salary and leave portal.

Trap alert

GeM (government procurement) is G2B, not G2C; e-Office is G2G, not G2C.

Digital India

- ▶ **Digital India** is a flagship programme of the Government of India.
- ▶ Launched on **1 July 2015** by the Prime Minister.
- ▶ Vision: to transform India into a **digitally empowered society and knowledge economy**.

Three vision areas

(i) Digital Infrastructure as a Core Utility to Every Citizen; (ii) Governance and Services on Demand; (iii) Digital Empowerment of Citizens.

Nine Pillars of Digital India

#	Pillar
1	Broadband Highways
2	Universal Access to Mobile Connectivity
3	Public Internet Access Programme
4	e-Governance: Reforming Government through Technology
5	e-Kranti: Electronic Delivery of Services
6	Information for All
7	Electronics Manufacturing
8	IT for Jobs
9	Early Harvest Programmes

Pillar 5, e-Kranti, is the service-delivery pillar.

e-Kranti

- ▶ **e-Kranti** means “electronic delivery of services”.
- ▶ It is **Pillar 5** of the Digital India programme.
- ▶ It is also called **NeGP 2.0** — an upgraded approach to the National e-Governance Plan.
- ▶ Vision: “**Transforming e-Governance for Transforming Governance**”.
- ▶ Mission: deliver all government services electronically through integrated and interoperable systems.

NeGP — National e-Governance Plan

- ▶ **NeGP** = National e-Governance Plan.
- ▶ Approved in **May 2006**.
- ▶ Vision: make all government services accessible to the common man in his locality, through common service delivery outlets, at affordable cost.
- ▶ Built around **Mission Mode Projects (MMPs)** — 27 MMPs with supporting components.

Keep in mind

NeGP is the older umbrella *plan*; e-Kranti later redefined it.

NeGD — National e-Governance Division

- ▶ **NeGD** = National e-Governance Division.
- ▶ Created in **2009** by the Ministry of Electronics and Information Technology (MeitY).
- ▶ An independent business division under the Digital India Corporation.
- ▶ Role: **programme management** and implementation support for e-Governance projects, with technical and advisory support.

What it is

NeGD is an *organisation* that supports e-Governance; it is not a plan.

NeGP vs e-Kranti vs NeGD

Name	What it is	Year	One word
NeGP	The umbrella e-Governance plan (27 MMPs)	2006	The plan
e-Kranti	Pillar 5 of Digital India; NeGP 2.0	2015	The approach
NeGD	Division under MeitY supporting projects	2009	The body

Trap alert

NeGD is a division, NeGP is a plan, e-Kranti is a pillar. Do not swap the three.

e-NAM — A Named Platform

- ▶ **e-NAM** = National Agriculture Market (also written eNAM).
- ▶ A pan-India **electronic trading portal** for agricultural commodities.
- ▶ Launched on **14 April 2016**.
- ▶ Implemented by the **Small Farmers Agribusiness Consortium (SFAC)** under the Ministry of Agriculture and Farmers Welfare.
- ▶ Portal: **enam.gov.in**.

e-NAM and Agricultural Marketing

- ▶ e-NAM **networks the existing APMC mandis** (Agricultural Produce Market Committee markets).
- ▶ It creates a **unified national market** for agricultural produce.
- ▶ Farmers get **online competitive bidding and transparent price discovery**; direct sale reduces intermediaries.
- ▶ AGMARKNET is a separate portal that gives agricultural marketing *information* (market prices); e-NAM is the *trading* platform.

Trap alert

e-NAM is about agriculture marketing, not general e-commerce.

The Citizen Portal

- ▶ The **National Portal of India** is **india.gov.in**.
- ▶ It is a **single-window** gateway to information and services of the Government of India.
- ▶ **MyGov** is the citizen-engagement platform for participative governance.

Single window

One entry point from which a citizen can reach many government services.

Named Platform — Purpose Matching

Platform	Purpose
e-NAM	Online trading of agricultural commodities
GeM	Online government procurement of goods and services
DigiLocker	Digital wallet for authentic documents
UMANG	Single mobile app for many government services
MyGov	Citizen engagement and participative governance
e-Office	Paperless office and file management

Match the platform to its purpose, not to a similar-sounding name.

Electronic Records

- ▶ The **Information Technology Act, 2000** gives legal recognition to **electronic records**.
- ▶ An electronic record can be stored, retrieved, and used in electronic form.
- ▶ A **digital signature** is used to authenticate an electronic record.
- ▶ Electronic records reduce paper, but they still need valid authentication.

Legal basis

It is the IT Act, 2000 that recognises electronic records and digital signatures.

Authentication

- ▶ **Authentication** proves that a message or document is genuine and comes from the claimed sender.
- ▶ A **digital signature** provides **authenticity, integrity, and non-repudiation**.
- ▶ **Encryption** provides **confidentiality** (it keeps the content secret).
- ▶ **Aadhaar** is used as a digital identity for authentication of a person.

Trap alert

A digital signature is *not* the same as encryption. Signature = authenticity; encryption = confidentiality (TRAP-15).

Trap Alert: Confusions to Avoid

- ▶ e-NAM = agricultural marketing; not general e-commerce.
- ▶ GeM = G2B procurement; not a G2C service.
- ▶ e-Office and PFMS = G2G; not G2C.
- ▶ NeGP (plan, 2006), e-Kranti (pillar/NeGP 2.0, 2015), NeGD (division, 2009) are three different things.
- ▶ A digital signature is not encryption.

Lesson 57: Recall

- ▶ e-Governance uses ICT to deliver government services.
- ▶ G2x: G2C (citizen), G2G (government), G2B (business), G2E (employee).
- ▶ Digital India (1 July 2015): three vision areas, nine pillars; e-Kranti is Pillar 5.
- ▶ NeGP (2006, plan, 27 MMPs); e-Kranti (NeGP 2.0, pillar); NeGD (2009, MeitY division).
- ▶ e-NAM (14 April 2016) networks APMC mandis for agricultural marketing (SFAC).
- ▶ Citizen portal = india.gov.in; the IT Act, 2000 recognises electronic records; a digital signature provides authentication.
