

Lesson 58 Practice: PYQ-Calibrated Final Retrieval and Audit

JKSSB Computer Awareness

October 10, 2026

Provenance: All 25 questions are original exam-pattern questions (*[Original]* plus the *[JKSSB FAA-pattern]*, *[JKPSI-pattern]*, *[SSC CGL-pattern]*, and *[JKSSB-pattern]* extension items, including MSQs); none reproduces an official paper item. Depth mix: L1 recall (Q1–Q10), L2 contrast/classification (Q11–Q17), L3 one-step application (Q18–Q20); formats include NOT/EXCEPT, matching, abbreviation, statement-evaluation, and assertion–reason.

Q1. *[Original]* Expand ISP.

- A. Internet Service Provider
- B. Intranet System Program
- C. Internet Server Process
- D. Internal Service Protocol

Q2. *[Original]* Which is the smallest unit of data?

- A. Byte
- B. Nibble
- C. Bit
- D. Word

Q3. *[Original]* Pressing which key starts a PowerPoint slide show from the beginning?

- A. F7
- B. F9
- C. F5
- D. F1

Q4. *[Original]* Every Excel formula must start with which symbol?

- A. +
- B. =
- C. %
- D. #

Q5. *[Original]* Which technology reads characters printed in magnetic ink?

- A. OCR

- B. OMR
- C. MICR
- D. QR code

Q6. [Original] Integrated circuits (ICs) were introduced in which computer generation?

- A. First
- B. Second
- C. Third
- D. Fifth

Q7. [Original] Which is an open-source mobile operating system?

- A. Android
- B. A proprietary desktop system
- C. A shareware trial system
- D. A firmware loader

Q8. [Original] Which firmware initialises the hardware and loads the operating system at startup?

- A. Device driver
- B. BIOS
- C. Compiler
- D. Spreadsheet

Q9. [Original] In an email address, the symbol @ separates which two parts?

- A. Domain name and host name
- B. User name and domain name
- C. Sender name and recipient name
- D. Subject and body

Q10. [Original] Which Access query retrieves data on a condition without changing stored records?

- A. Update query
- B. Append query
- C. Delete query
- D. Select query

Q11. [Original] Which of the following is **NOT** true of cache memory?

- A. It holds recently and frequently used data.
- B. It is faster than main memory.
- C. It acts as a permanent backup of the contents of RAM.
- D. It helps exploit locality of reference.

Q12. [Original] RAM is a _____ memory, whereas ROM is _____.

- A. non-volatile; volatile
- B. volatile; non-volatile
- C. secondary; primary
- D. read-write firmware; cache

Q13. *[Original]* Which pairing is correctly matched?

- A. Plotter — input device
- B. Scanner — output device
- C. MICR — reads magnetic ink characters
- D. Sound card — input device

Q14. *[Original]* Evaluate the statements:

- I. Registers are the fastest storage in a computer.
- II. Cache memory is faster than main memory.
- III. RAM is non-volatile and retains data when the power is off.

- A. I only
- B. I and II only
- C. II and III only
- D. I, II, and III

Q15. *[Original]* Which statement correctly distinguishes a digital signature from encryption?

- A. A digital signature encrypts the body so only the recipient reads it.
- B. Encryption provides authenticity while a signature provides secrecy.
- C. A digital signature provides authenticity and integrity, while encryption provides confidentiality.
- D. Signatures and encryption are different names for the same process.

Q16. *[Original]* Which statement correctly distinguishes POP3 from IMAP?

- A. POP3 keeps mail synced on the server; IMAP deletes it locally.
- B. POP3 downloads mail to the local machine; IMAP keeps mail synced on the server.
- C. Both POP3 and IMAP send outgoing mail to the printer.
- D. POP3 and IMAP are different names for the same web browser.

Q17. *[Original]* Assertion (A): IPv6 uses 128-bit addresses. Reason (R): HTTP/3 runs over QUIC rather than TCP.

- A. Both (A) and (R) are true, and (R) is the correct explanation of (A).
- B. Both (A) and (R) are true, but (R) is not the explanation of (A).
- C. (A) is true, but (R) is false.
- D. (A) is false, but (R) is true.

- Q18.** *[Original]* A nested IF in Excel tests a cell that is blank. The formula returns the value meant for the “equal to zero” branch. What does this show?
- A. Blank input is treated exactly like a typed number in every case.
 - B. Blank and non-numeric input must be traced branch by branch; the result depends on how the test treats the blank.
 - C. Nested IF never accepts an empty cell under any condition.
 - D. The equals sign at the formula start decides the branch taken.
- Q19.** *[Original]* A quad-core 2.4 GHz machine with 16 GB RAM and a 1 TB SSD runs one program slowly while other programs run normally. What should be diagnosed first?
- A. The stated bottleneck: multithreading, memory use, or disk activity of that program.
 - B. The CPU clock, because 2.4 GHz is always too slow.
 - C. The monitor size, because display size sets program speed.
 - D. The keyboard layout, because input devices set execution speed.
- Q20.** *[Original]* Two ranges must be counted where both conditions hold (range 1 meets criterion 1 AND range 2 meets criterion 2). Which formula approach is correct?
- A. COUNT with a single range and no criteria.
 - B. COUNTIFS with range–criterion pairs for each condition.
 - C. A plain SUM with no conditions attached.
 - D. An AVERAGE of the two ranges with no criteria.
- Q21.** *[JKSSB FAA-pattern]* Which memory loses its contents when power is switched off?
- A. RAM
 - B. ROM
 - C. Hard disk drive
 - D. Magnetic tape
- Q22.** *[JKPSI-pattern]* Which shortcut copies selected text in Windows?
- A. Ctrl+C
 - B. Ctrl+P
 - C. Ctrl+O
 - D. Ctrl+N
- Q23.** *[SSC CGL-pattern]* Which of the following is the smallest unit of data?
- A. Bit
 - B. Byte
 - C. Nibble
 - D. Kilobyte

- Q24.** *[JKSSB-pattern]* (MSQ: select ALL correct options.) Which statements about mail protocols are correct?
- A. SMTP sends outgoing mail.
 - B. POP3 downloads mail to the local machine.
 - C. IMAP keeps mail synced on the server.
 - D. HTTP prints paper letters.
- Q25.** *[SSC CGL-pattern]* (MSQ: select ALL correct options.) Which pairs are correctly matched?
- A. F5 – start slide show from the beginning
 - B. F7 – spelling check in Word
 - C. Ctrl+S – save file
 - D. Ctrl+P – paste content
- Q26.** *[PYQ-adapted: JKSSB Website Operator 2026 Q78, provisional key; SRC-04/SRC-07]* What character must begin a standard Excel formula?
- A. =
 - B. #
 - C. @
 - D. &
- Q27.** *[PYQ-adapted: JKSSB Junior Assistant 2026 Q78, final key; SRC-03/SRC-06]* How many bits are in an IPv6 address?
- A. 32
 - B. 64
 - C. 128
 - D. 256
- Q28.** *[Original]* Which of the following is NOT a storage device?
- A. Keyboard
 - B. SSD
 - C. HDD
 - D. USB flash drive
- Q29.** *[Original]* Which action best protects against losing files after accidental deletion or hardware failure?
- A. Maintain and test backups
 - B. Increase monitor brightness
 - C. Rename the desktop folder
 - D. Disable all updates

Q30. *[Original, MSQ drill]* (MSQ: select ALL correct options.) Select the accurate statements.

- A. RAM is volatile.
- B. IPv6 addresses are 128 bits.
- C. Excel formulas commonly begin with '='.
- D. A section break is the same as a page break.
