

high addresses

main frame

```
int a = 5;
```

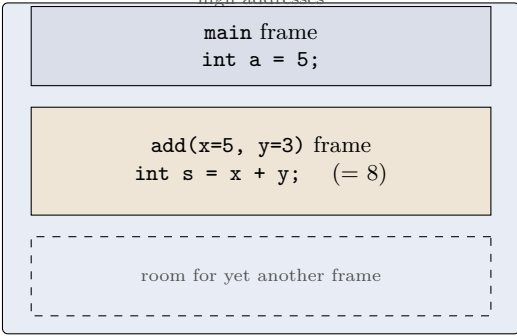

add(x=5, y=3) frame

```
int s = x + y;    (= 8)
```

room for yet another frame

low addresses

stack grows down

The diagram illustrates a stack structure. It consists of a large light blue container. Inside, there are three rectangular frames. The top frame is light blue and contains the text 'main frame' and 'int a = 5;'. The middle frame is light orange and contains the text 'add(x=5, y=3) frame' and 'int s = x + y; (= 8)'. The bottom frame is a dashed outline, light blue, and contains the text 'room for yet another frame'. To the right of the container, a blue arrow points downwards, with the text 'stack grows down' next to it. The container is labeled 'high addresses' at the top and 'low addresses' at the bottom.
